

dropped following table(s):

- film_category
- city
- country
- film_text
- language
- address
- payment

dropped "film_category" table and
put category_name in "film" table

dropped tables "city" and "country"
and put the columns "city" and "country"
inside "customer", "staff", "store" tables

dropped "language" table because there's
only 1 language input so far

dropped "payment" table and put the
"payment", "amount" and "payment_date"
columns inside "rental" table

dropped "address" table and distribute the
columns "address", "district", "postal_code" and
"phone" to "customer", "staff" and "store" tables
